DETAILED ACTION

1. Applicant's election of invention I, claims 1-20, 31, 33-36, 38, 40-47, 68-71 is acknowledged. Applicant's election of species of SEQ ID NO: 2 relevant to Group I claims 13-17, 19, 43, 45, 46, 69, and 70 is acknowledged. Claims 1-12, 18, 20-42, 44, 47-49, 52-68, 71-115 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

For the purposes of clarification, Applicant has elected the genus of chemical structures defined by formula VII recited in claim 13 and dependent claims thereto. Applicant has further made a species election of SEQ ID NO: 2.

Applicant traverses the restriction requirement and argues that the Examiner has not applied the standard for lack of unity nor has the Examiner provided adequate reasoning for a conclusion of lack of unity. These arguments have been considered but are not persuasive. The claims are directed to peptides that possess affinity for a phospholipid. The structure of these peptides are distinct as evident by the distinct formulas used to define the different structures of each genus. The common special technical feature then is their affinity for a phospholipid, which is NOT a contribution over the prior art as demonstrated in the teachings of Cordier-ochsenbein *et al.* Applicant has failed to specifically address these teachings as they relate to the claims. Thus, the restriction for examination purposes is deemed proper and is made **FINAL**.

2. Applicant's amendment of claims 13, 16, 18, and 21 is acknowledged. Claims 13-17, 19, 43, 45, 46, 69, and 70 are under examination.

Application/Control Number: 09/787,923

Art Unit: 1653

Specification

3. The disclosure is objected to because of the following informalities: In Figure 6B, there is an error in the numbering of the sequence beginning at position 75. The Figure shows both a Gly75 and a Leu75 (interpreted as Leu80). Appropriate correction is required.

Claim Objections

4. Claims 11 is objected to because of the following informalities: Claims 16 and 17 recite nonelected subject matter withdrawn from consideration. Appropriate correction is required.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 13-17, 19, 43, 45, 46, 69, and 70 are rejected under 35 U.S.C. 102(b) as being anticipated by Kaplan *et al.* (J Biol Chem. 1988 Jun 15;263(17):8037-43). Kaplan *et al.* teach Endonexin II that is a member of the Ca⁺⁺-dependent phopholipid binding protein family of annexins (regarding claim 19, 43). Kaplan *et al.* cloned and produced recombinant endonexin II in *E. coli*. Endonexin II is identical to SEQ ID NO: 2 at positions 25-72, and thus comprises the structure defined by formula VII (regarding claims 13-17, 69-70). Claims 45-46 recite inherent properties of Endonexin II or SEQ ID NO: 2 as limitations, and are thus taught by Kaplan *et al.* Thus, the reference clearly anticipates the invention as recited in the claims.

Application/Control Number: 09/787,923

Art Unit: 1653

Conclusion

6. No claims are allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sheridan K Snedden whose telephone number is (571) 272-0959. The examiner can normally be reached on Monday - Friday, 8:30 AM to 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jon Weber can be reached on (571) 272-0925. The fax phone number for regular communications to the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0196.
